

New Module

BMX Fragmenter

First real 3D fragmentation analysis from drone imagery

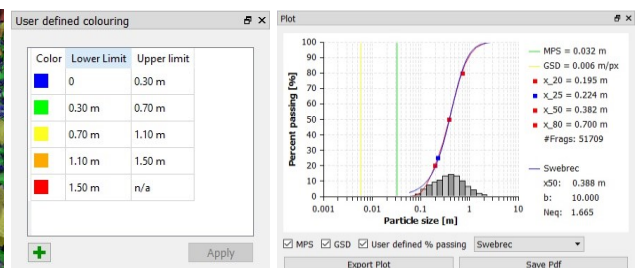

Features

- Combined 2D and 3D analysis
- Fully automated
- Scales automatically
- Oversize detection
- Fragmentation modelling
- PDF report

Benefits

- Overcomes drawbacks of pure 2D analysis
- Fits perfectly for blast quality control
- Heavily stronger statistics due to larger amount of detected particles
- Integrates seamlessly with BlastMetriX UAV

3GSM – Simply Measure!
