

BlastMetriX 3D

Complete 3D survey of blast sites

Reduce drill and blast costs

Real 3D images for your documentation

Fly-rock prevention

Also available on
service basis

Workflow

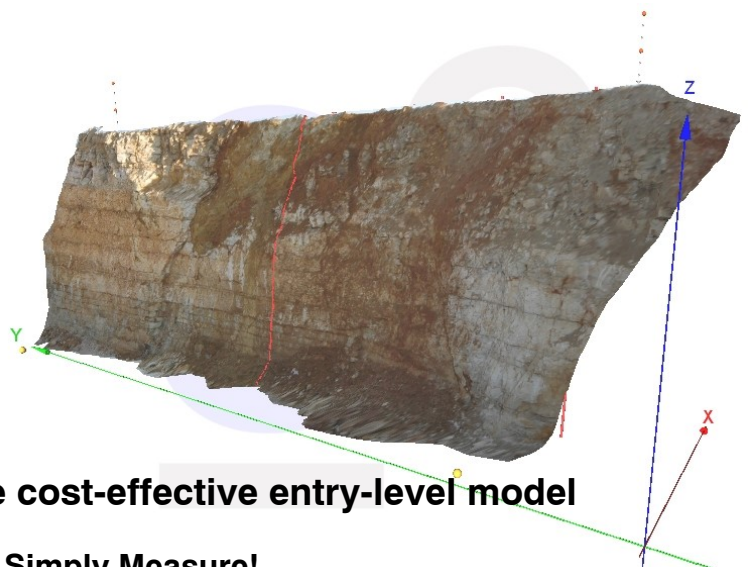

- Setting up the markers
- Taking pictures of area to blast using calibrated (off-the-shelf) camera
- Generating a 3D image on the computer
- Planning and optimising the blast
- Printing borehole plan and profiles

Benefits

- Fast and simple operation
- Full documentation by 3D images
- **Safety increase**
- Blast optimisation

Components

- Calibrated SLR camera
- Zoom lens
- Markers
- 3D reconstruction software
- 3D software for blast planning

NEW! BlastMetriX 3D Basic - the cost-effective entry-level model
